

LCO PETROLEUM CORPORATION OF PERU

(Sucursal del Perú)

Date: September 5th, 84

Hour: 11:00 hrs.

FROM: Petroleum Engineering Department

TO : Geological Department

REF : Completion Of The Well Z2A-21-575-D-L06 (L06-21)

For the completion of this well, Geological Department suggest:

PRODUCTION CASING 5 1/2

6) PRELIMINARY FORMATION

Float shoe at 5250' (MD); (VD)

TOPS ON DLL-GR

Float collar at 5210'

INTERVALS TO SET CENTRALIZER

- a) From 5210' to 3700'
- b) From to
- c) From to
- d) From to

Tereb
Talara at surface
Chacra at 2350' MD
2251' VD
S 407 E 289
Rio Bravo Sdy. at 3703 MD
3465' VD
S 942 E 561
Rio Bravo Shly. at 5285' MD
4902' VD
S 1572 E 753
TD 5503'

***CEMENTATION**

- a) Shallowest sand to be completed
From to
- b) Suggest the top of cement at 2900'

Net sand w/ 60 api units : 405'

INTERVALS TO RUN GR-CCL LOG

- a) From 5210' to 3700'
- b) From to
- c) From to
- d) From to

FORMATIONS, MEMBERS OR SANDS TO BE COMPLETED FOR INITIAL PRODUCTION

- a) From to
- b) From to

REMARKS: *See Engineering Program.
