FROM: Petroleum Engineering Department

TO : Geological Department

REF : Completion Of The Well Z2A-21-599-D-L06 (L06-7)

For the completion of this well, Geological Department suggest:

1) PRODUCTION CASING 5 1/2

Float shoe at 5800' (MD); 4430' (VD)

Float collar at 5760'

2) INTERVALS TO SET CENTRALIZER

a) From 5760' to 3800'

b) From _____ to _____

c) From _____ to _____

d) From _____ to _____

3) *CEMENTATION

a) Shallowest sand to be completed

From _____ to _____

b) Suggest the top of cement at 2800'

4) INTERVALS TO RUN GR-CCL LOG

a) From 5760' to 3800'

b) From _____ to _____

c) From _____ to _____

d) From _____ to _____

5) *FORMATIONS, MEMBERS OR SANDS TO BE COMPLETED FOR INITIAL PRODUCTION

a) From _____ to _____

b) From _____ to _____

REMARKS: *See Engineering Program.

6) PRELIMINARY FORMATION

TOPS ON TEL-GR

Talara at surface

Chacra at 2710'

Rio Bravo at 3940'

Rio Bravo Shly. at 5690' *No!!*

TD at 5838'

Net sand : 817' w/62 api.
