

BELCO PETROLEUM CORPORATION OF PERU

(Sucursal del Perú)

Rec. April 8/85
mlu

Date: March 15th, 1985

Hour: 10:15 a.m.

FROM: Petroleum Engineering Department

TO : Geological Department

REF : Completion Of The Well Z2A - 21 - 610 - D - L06 (L06-6)

For the completion of this well, Geological Department suggest:

1) PRODUCTION CASING 5 1/2

Float shoe at 5300' (MD); 4167' (VD)

Float collar at 5260'

2) INTERVALS TO SET CENTRALIZER

a) From 5260' to 4700'

b) From _____ to _____

c) From _____ to _____

d) From _____ to _____

*3) CEMENTATION

a) Shallowest sand to be completed

From _____ to _____

b) Suggest the top of cement at 3700

4) INTERVALS TO RUN GR - CCL LOG

a) From 5260 to 4700

b) From _____ to _____

c) From _____ to _____

d) From _____ to _____

*5) FORMATIONS, MEMBERS OR SANDS TO BE COMPLETED FOR INITIAL PRODUCTION

a) From _____ to _____

b) From _____ to _____

REMARKS: See Engineering Program

6) PRELIMINARY FORMATION

TOPS ON DLL-GR

Talara at surface

Chacra at 2116'

Rio Bravo at 4536'

T.D. 5926

Net Sand 252' w/57 api
